This looks and plays almost exactly like the game "The Deal", which I also loved. I just started playing this game, but I can already tell you I am going to love it. More detailed graphics than the average JRPG (just like The Deal game), and good music, at least one song I recognize also from The Deal, I believe. The story, characters and fighting system seem to be good as well. I will update my review if necessary. I recommend this game to those who love JRPG/RPG maker games.

After playing a few hours, my one gripe is the unbalance, having too many monster fights on the main world when walking. I am stuck in one place where it is an attacked castle. I have requested help where I cannot seem to get very far without my two characters dying. I have tried several times and have requested help on the forums without any success. I hope that changes.. I've read little of the original stories from Conan Doyle but this game does get the feel of them. Less puzzle loaded and more clues and plot oriented, the game helps you keep track of the case by reviewing the main topics discovered at the end of each day. Also, the backgrounds are immensely developed, and so are the voice acting and speech of the characters. What a change from the shabby Mystery of the Mummy.. Blanco is a really fun game. It's your regular 3d platformer but with 8-bit styled graphics.

Pros :

Almost everything

Cons :

Level selection is difficult, but once you figure it out, your likely to do a good job for the rest.

If you don't like challenge DO NOT PLAY! I like challenges so I love this game. The demo design is different from the full game though:V.

10V10. As a long time sim pilot I find myself very critical of simulation games in general as they often overlook key mechanics, physics or otherwise, in their flight models. I am pleased to say that does not seem to be the case here. As an older jet fighter this aircraft has several quirks that I would expect such as an extrordinarily long turbine spool-up time before throttle changes are realized. Its stall characteristics are similarly drastic but again this is what I would expect from this airframe. Despite (and in fact because of) these nuances I find the MiG-15 a joy to fly!

It has an impressive top speed (complete with the control loss as we approach overspeed that I know the aircraft suffered from) and enjoys a tight turn radius with some fun fast-action air-brakes (that you super need) both in landing and dogfights.

Speaking of dogfights a friend and I dueled the MiG-15 and F-86 and were impressed at how well the aircraft matched up with eachother. They were noted as having very similar performance specs (not to say they fly the same because they don't) and we were very pleased that Belsimtek did such a great job matching those aircraft to historical specifications.

All-in-all I very much enjoy this aircraft and would recommend it.

The price tag is pretty steep though so save your money and get it on sale!. its ok i feel it needs more work feels clunky hope it gets better with updates

too dam short!!! no weapons nothing like i tought it would be very dissapointing you just walk trough a story thats in russin,with english subtitles very poor game i give them an A for effet it dose look really good but game play they could have added more. I loved this game. I really enjoy escape rooms and this captured some of that feeling. I was also really excited to try with a stranger. It worked great and we had a lot of laughs. I really loved when we started over, and switched roles. To see what it looks like from the other side is so cool.

If they ever make a paid version with more rooms and levels, I will buy it immediately.. Alma: Who is the doll?

Tanya: ME

Alma: Go to the furnace. Burn yourself...

Bee: I put a wood now... It's BURNING... GO GO GO!!!

Tanya: Who me?

(the girl behind us turned into a monster)

Bee: AHHHHHH SHE GOT MAD!!!

Cyanine: NOOO NOT ME! NOT ME!!!

(cyanine turned into a doll)

Cyanine: I'm a doll... so we are small. We are dead but not dead...

Bee: Come inside here! Burn yourself so that you will be human again...

hahaha

This game!

will burn my friends again :D. Great game! One of the best arcade-style zombie games around, pretty simple to understand and fun to play. The mechanics of the game are great, the developers are active and constantly pushing new updates through our feedback. The best part is that you get the feel of being there since there is no teleport option and as you move in your play area, you move in your fixed spot to grab stuff around. Everything is proportionally right, it feels so real that I even dropped the controllers over the invisible table in front of me!

Totally recommended.. Hi there. I bought this product from Steam on 22 Septemebr 2015 and it is successfully installed in the Steam Library. However, when I load Friday Harbor, the runway is non-existent and on take-off the aircraft is buried completely in sand with no sign of any updated graphics anywhere in the airport area as advertised. I have been trying absolutely everything to find a solution to the problem and even applied for a refund from Steam, which was refused as I exceed the time limitation.

I am very disappointed to say the least but, would appreciate advice on how the problem can be resolved as I would really like to get the programme up and running correctly. Maybe a complete reinstallation of the product could be the answer.

I look forward to a reply asap.

Regards

Doug Welsh
